Email: aryanbogia2004@gmail.com

Mobile: 9034913773

SKILLS

Languages: C++, JavaScript, Python, C

Tools/Platforms: Node.js, Express, React, MongoDB/Mongoose, REST APIs, JWT, Socket.IO, EJS, Git/GitHub, Vercel, Render, GitHub Pages, Linux

Soft Skills: Communication, Problem-Solving, Adaptability

PROJECTS

CitizenPulse (KITE) | *React, Node/Express, MongoDB Atlas*

Nov '25 – Jan '26

- Built a civic-tech platform enabling citizens to access government schemes, laws, jobs, and alerts in one place.
- Implemented authentication and an admin panel, and seeded structured data across schemes, laws, jobs, and alerts modules.
- Deployed a full-stack MERN application with the frontend on Vercel and backend on Render.

DetectiveAI | *Node.js, Express, EJS, Groq API*

Mar '26

- Built a turn-based AI detective game where players interrogate an LLM-driven suspect to solve a case.
- Designed the server-rendered game flow with Express and EJS and deployed the app on Render.
- Used the Groq API to generate context-aware suspect responses that adapt to the player's line of questioning.

Wiki Search Engine | *Python, TF-IDF, PageRank, Redis*

Aug '26

- Building a Wikipedia-scale search engine over a ~25GB compressed English Wikipedia text dump.
- Implementing TF-IDF ranking and a PageRank-based link-graph scoring model inspired by the original Brin & Page paper.
- Using Redis as a fallback store for indexing when custom on-disk indexing structures hit scaling limits.

ACHIEVEMENTS

Mathematical Code Similarity Engine Using Spectral Graph Theory

- Filed a patent application at Lovely Professional University for a code-similarity detection engine based on spectral graph theory.
- Modeled source code as graph structures and applied spectral graph theory to compare structural similarity between codebases, beyond simple text or token matching.
- Aimed at detecting plagiarism and code reuse patterns that evade conventional string-based similarity checkers.

CERTIFICATES

45-Day Summer Training in Data Structures & Algorithms

Splen Technologies & Education Pvt. Ltd.

2026

EDUCATION

Lovely Professional University

Bachelor of Technology, Computer Science and Engineering

Phagwara, Punjab

Aug' 24 – 2028

U.S.M Sr. Sec. Public School

Intermediate

Hisar, Haryana

2022 – 2023
